ORDNANCE TECHNOLOGY SERVICE, INC.

OTS IS MAINTAINING A LINK TO THE TORPEDO KNOWLEDGE BASE IN NORTHEAST OHIO.

Northeast Ohio has a 30-year history of involvement in the design, development, production and support of both light and heavyweight torpedoes for the US Navy and approved foreign Governments.

Although the two major systems contractors, Marine Mechanical (formerly TRW, ARGO Tech) and Northrop Grumman (formerly Cleveite, Gould, Westinghouse) have ceased torpedo production in the area, much of the vendor structure is still intact. OTS has maintained contact with many of these Original Equipment Manufacturers.

Unfortunately, some of these manufacturers have ceased operations, and OTS has obtained relevant procurement and process documentation.

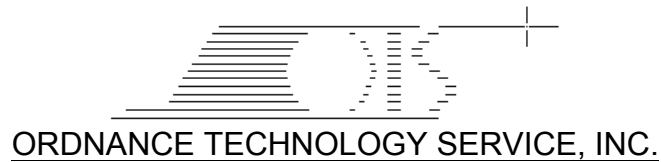

OTS also maintains contact with torpedo knowledgeable personnel and calls upon their skills to solve related support issues.

OTS MAINTAINS A HISTORICAL LIBRARY ON THE MK32 TORPEDO LAUNCH SYSTEM

In support of governmental and OEM torpedo clients, OTS is involved with the MK32 Launch System to provide a commercial source for associated hardware.

Over the years OTS has been increasing its capabilities in the MK32 torpedo launch system by making significant enhancements and acquisitions in our drawing and data library.

We have a viable vendor base, acquisition experience and knowledge of production techniques, giving us the ability to support this system with spare and repair parts.

◆ OTS SUPPORTS SHIPBOARD TORPEDO HANDLING EQUIPMENT ◆

With the right sizing of the US Navy, availability of shipboard torpedo handling equipment will become more difficult as demand decreases. OTS has acquired a historical source and drawing library in order to meet requirements for spare and repair parts. Items in this product area include the Seamaster Shipboard Storage System, various dolly's, tools and other ancillary equipment.

◆ OTS PROVIDES SPARE AND REPAIR PART SUPPORT FOR TORPEDO WEAPON SYSTEMS ◆

Due to our extensive network of historical manufacturers OTS provides its customers the advantage of expedited delivery time, proven quality and competitive pricing.

◆ OTS PROVIDES NEW MANUFACTURED TORPEDO SYSTEM HARDWARE ◆

OTS represents several ISO 9000 qualified manufacturers, with a demonstrated capability of supplying quality built parts for the MK48 ADCAP MOD 6 Torpedo. From these knowledgeable sources new mechanical, electrical and electronic parts can be developed, reversed engineered or manufactured to print. We use our vendor base, lessons learned and system knowledge to supply parts that are manufactured correctly.

◆ OTS KNOWLEDGE AND EXPERIENCE ◆

Our knowledge of the weapon system, logistic issues and production lessons learned, gives us the ability to ensure that the end user will receive a truly interchangeable part. OTS staff personnel have 13 to 30 years Torpedo System support knowledge and material acquisition experience. We monitor production, inspect/evaluate the parts, package, label and over pack for shipment.

ORDNANCE TECHNOLOGY SERVICE, INC.

SPECIALISTS IN SPARE PARTS FOR:

LIGHTWEIGHT TORPEDOES

- **MK 54**
- **MK 50**
- **MK 46**
- **MK 44**

HEAVYWEIGHT TORPEDOES

- **MK 48 & ADCAP**
- **MK 37**
- **NT 37 (Limited components)**
