

ORDNANCE TECHNOLOGY SERVICE, INC.

**Specializing in Logistic Support for Torpedoes, Launch Tubes,
and related Support & Handling Equipment.**

(MK54, MK50, MK48 ADCAP, MK48, MK46, MK44, NT37 and MK37)
(MK32 Torpedo Launch System)

The components OTS offers include but are not limited to:

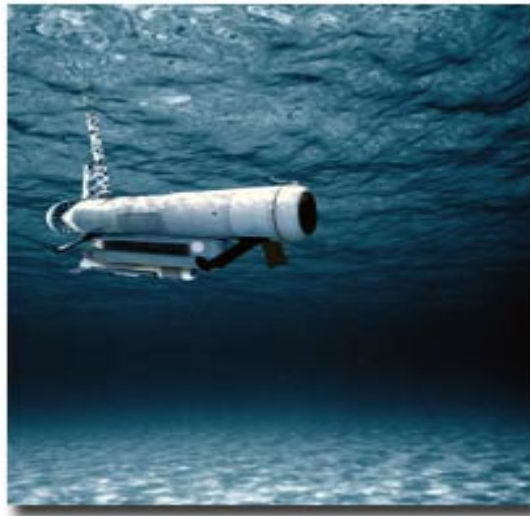

- Shells
- Cable Assemblies
- Machined parts
- Electro / Mechanical Assemblies
- Underwater Coatings
- Paint capability to Weapon Specification WS22351
- P1 pressure test capability
- Vacuum testing capability

10950 WELLNESS WAY

TELEPHONE: (440) 205-0677/ FAX: (440) 205-0678
E-Mail: ots@ordtech.com/ Web Site: www.ordtech.com
Cage Code: 0F1X1

Current applications with similar technology include:

UUV	Unmanned Underwater Vehicles
MRUUVS	Mission-Reconfigurable Unmanned Underwater Vehicle Systems
LMRS	Long-term Mine Reconnaissance System
EMD	Expendable Mine Destructor
AUV	Autonomous Underwater Vehicle
TARGETS	Underwater Targets

Torpedoes and other underwater applications

OTS is finding significant success in transferring its 20+ years of torpedo expertise to other underwater applications that utilize similar technology and dimensions. As current designs of Unmanned Underwater Vehicles and targets are 21" and 13" in diameter, OTS torpedo tooling and capabilities prove a perfect match in similar technology.

Further, OTS is one of a select few firms that has powder paint capability to Weapon Specification WS22351, as required on torpedoes. OTS also has the ability to test cable assemblies and various mechanical assemblies to P1 depth pressure.

In summary, Underwater Vehicles and Torpedoes are similar in product and environment. It requires exceptionally high quality, and understanding of the environment the product must work in. OTS has the torpedo experience supporting this critical environment.

Design & Build your product on the decades of expertise found at OTS and in the Cleveland area. Engineering support is also available on call.
