Concord Township, OH 44077

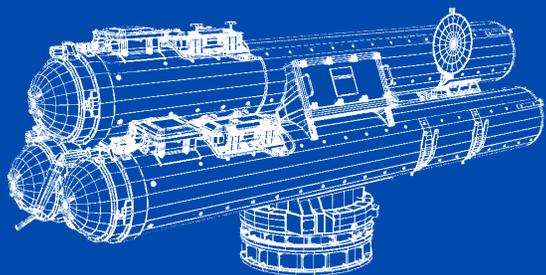

High Quality. Responsive Service.  
Competitive cost. The logical  
choice.

*Proud partner of the U.S. Navy*

# A Rich History

For over 60 years, Northeast Ohio has contributed to the design, development, production, and support of U.S. and allied light and heavyweight torpedoes.

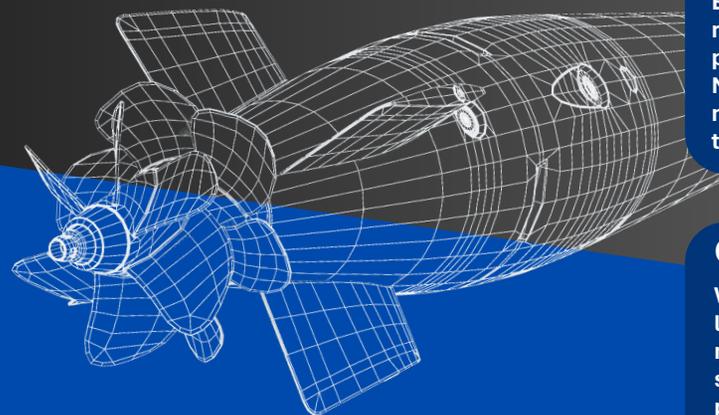

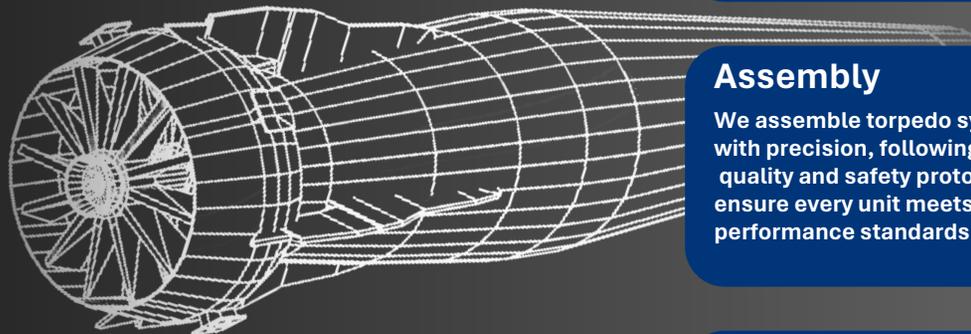

OTS maintains active relationships with original equipment manufacturers and has secured key procurement and process documentation from companies no longer in operation. OTS also works with experienced torpedo personnel to address technical support needs.

# Products

Today, OTS supports a wide range of torpedo and ordnance systems, including:

- MK48 Heavyweight Torpedo
- MK54 & MK46 Lightweight Torpedoes
- MK32 Torpedo Launch System
- MK30 Acoustic Target
- MK37, NT37 & MK44 Legacy Torpedoes
- Ordnance Handling Equipment
- UUV and Harsh Environment Components

# Services

## Engineering

We engineer high-performance undersea systems built for reliability, accuracy, and endurance - rigorously tested for mission success.

## Coatings

Our coating systems protect components in harsh marine environments, meeting strict defense standards for durability, corrosion resistance, and long-term performance.

## Assembly

We assemble torpedo systems with precision, following strict quality and safety protocols to ensure every unit meets performance standards.

## Testing

Every torpedo component is rigorously tested for performance, reliability, and Navy compliance—ensuring mission-ready systems every time.

## Customer Service

We provide responsive, expert lifecycle support to ensure readiness, resolve issues, and sustain long-term performance.
